## Never mind the bollocks -- here's the Rolling Stones

The vault opens a little wider with "Ed Sullivan" and "Some Girls" extravaganzas

Some Girls just wanna get....Even better: Coming up on Nov. 21 is a plunge into Some Girls, an album that some fans (guilty!) argue was the Stones' last perfect album, every song a keeper. We're getting a triple dose here. First off, a DVD of a Texas performance is coming out, and with punk rock becoming a rising force in music the Stones gave back as good as they got. Check out the advance clip of "Beast of Burden."

The album is getting the deluxe treatment as well, with a two-CD set that includes such great unreleased songs as Keith Richards' version of "We Had It All" and outtakes such as "No Spare Parts." The inevitable super-deluxe box is available as well.

All in all, it's a very good month to be a Stones fan - especially if you're Bill Wyman.
